

Package Contents:

Socket 4 x 1

Socket 12 x 1

Headlight Warm light 15CM x 1

Headlight Warm light 30CM x 2

Lamp set A x 2

Lamp set B (2 sections) x 3

Colored light strip warm light A (3 sections) x 1

Colored light strip warm light B (2 sections) x 2

Cob light with blue light x 1

30cm cable ×1

Battery box AA (USB port) x 1

USB port 50CM x 1

Some building blocks

Notes (the pictures in this paragraph are for demonstration purposes only and are not the parts of this set) :

Wiring above and below the board

Wires can be run between boards or underneath boards , but they must be placed correctly between the studs.

Connect the electrical outlet to the socket

Be extremely careful when inserting the wire plug into the outlet. The plug only goes in one way. With the plug facing up, look for the soldered "=" symbol on the left side of the port. The side of the plug with the exposed wire should be facing the soldered "=" symbol as you insert it into the port. If the plug does not fit easily into the port, do not force it.

Inserting the socket incorrectly may cause the pins inside the port to bend or may cause the socket to overheat when connected.

When installing the light pellets on the building blocks, make sure they are properly positioned (with the yellow LED assembly exposed). You can place them directly on top of the building block studs or in between.

Insert the battery into the battery compartment

The specifications of several battery boxes are different, please pay attention to the positive and negative poles of the batteries.

AA battery box Correct battery installation

Button battery box (flat) battery correct installation method

Button battery box (round) battery correct installation

Installation Instructions

Take out the AA battery box and correctly install 3 AA batteries (new batteries are recommended)

Take out the USB power cable and insert it into the battery box (different shapes of the battery box will not affect normal installation)

Take a 4-socket and plug the power cord into the 4-socket (图片只是示例)

Plug and socket connection method

Align the "=" on the plug with the "=" side on the receptacle

The "=" on the plug
can clearly see one
side of the line

There are two silver
dots next to the "="
socket on the socket

equal sign equal sign

Take a 15cm warm light headlight and insert it into 4 seats

Test whether all lights shine normally, if you have any questions, please contact customer service in time (there is no battery in the battery box, you need to bring 3 No. 5 batteries), you can also plug in the power supply of other USB ports

Start the installation

Take out the strip B

Take out one of the light strips, tear off the adhesive backing, and paste the first section of the light strip first

Restore the bricks, and put the remaining light strips and joints back

Restore the red-circled bricks

Do the same to remove the right brick

Take out the second strip and paste the first strip as well (circled in red, same as

before)

After pasting the first section of the light strip, restore the building blocks

Paste the second strip of light

Take out the light group B (the color of the line does not affect the installation)

1

Unscrew a slight opening

Put the extra thread away and hold it down with the minifigure

It's the same on the right, remove the blocks

Repeat what you just did

Take out the bricks you just disassembled and break them down as shown

Restore the building blocks

Go to the back of the building, and there are 5 wires to restore the blocks

Continue to restore the bricks

Take out 2 1×1 transparent building blocks and 2 headlight grains with warm white 30cm, and follow the arrows through the blocks

The other one is the same as the previous one

Restore the building blocks

Take out the COB light strip and disassemble the left block

Arrange the street light wire on the left

Trevi Fountain

There are three wires under the turn

Thread all the wires through the bricks (no fixed requirements)

4 expansion boards × 1
12 expansion boards × 1

Insert the wires into all four shields

30cm cable×1

The cable is inserted into the expansion board

Tear off the adhesive backing

Pull the wire to the back of the building

Remove the previously disassembled bricks and strip A

Wires are passed through the gaps in the blocks

Take out the light group A and the bricks in the figure

Install another spotlight

Take out 1 transparent building block and 1 15cm warm white headlamp particle

Let the wire run through from the small end

Installed here, the wire goes behind

Dismantle the bricks shown in the diagram

4 expansion boards × 1
12 expansion boards × 1

The three wires on the left can be wound into a loop and inserted into the expansion board

Install the middle three wires (can be bundled with the supplied white wire)

Install the remaining wires

Remove the double-sided tape and stick it on the 12-seat expansion board

Remove the USB power cable and insert the remaining empty space in the expansion board

This is the end of the installation

USB port for connecting devices

LED LIGHT

⚠ NOT INCLUDE THE MODEL
