Socket 6x 1

Socket 4x 1

Lamp grain white light 15cm x 4

Lamp grain particle blue light 15CM x 1

Lamp grain red light 15CM x 2

Led soft light strip Blue ×2

Cable 5CM×3

Usb power Cable &AA battery case

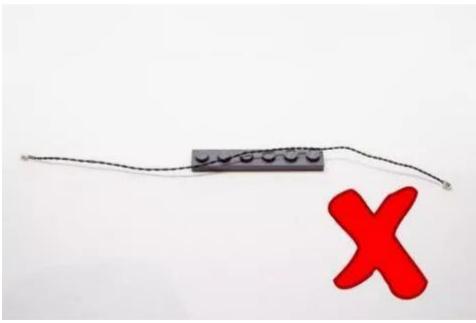

Building block parts

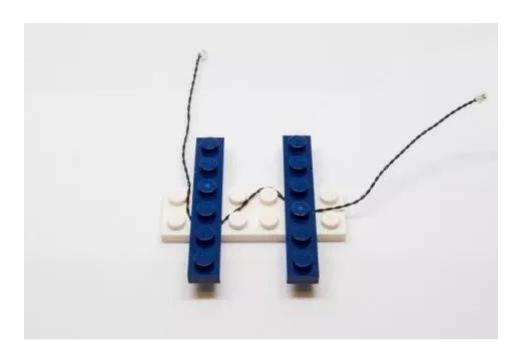

Precautions (The content of the pictures appearing in this paragraph is for demonstration and not part of this set):

Wire above and below the building blocks

The wires can be arranged between the boards and the boards or underneath the boards, but they need to be placed correctly between the studs

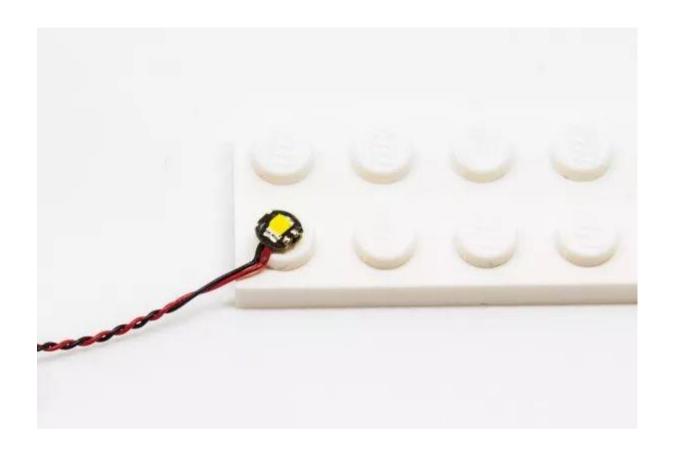

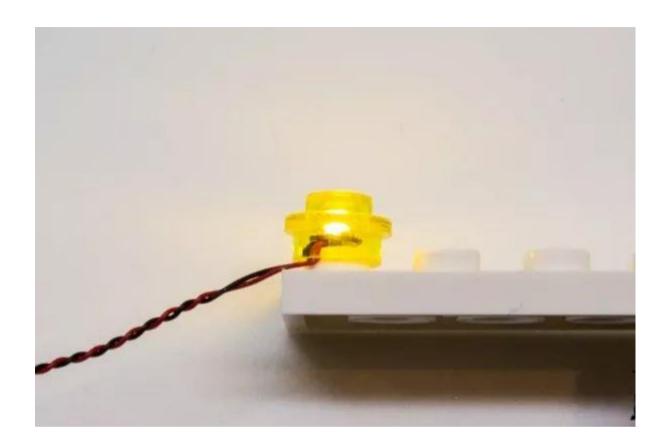

Install the light particles on the building blocks

Please make sure they are placed correctly (yellow LED components exposed). You can place them directly on top of the block piece studs or in between.

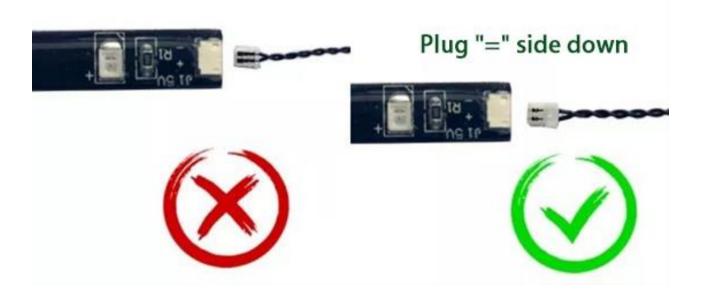

Connect the wire to the light bar

Be extra careful when plugging the wire into the strip connector, the plug can only be inserted in one way. Place the light bar with the illuminated side facing up, making sure the side of the plug exposed wire is facing down. If the plug is not easy to insert into the interface, do not force it in. so as not to damage the connector and plug.

The correct connection method of the light bar

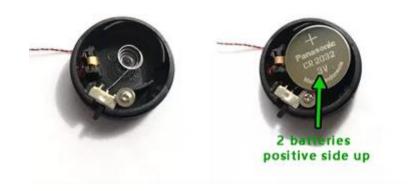

Insert the battery into the battery compartment

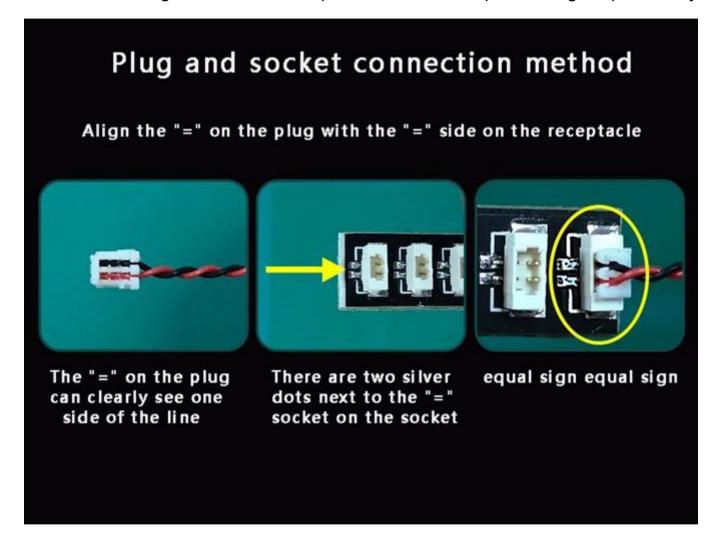

Several battery compartments have different specifications, please pay attention to the positive and negative poles of the battery.

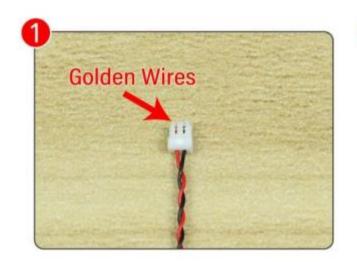

Button battery box (round) battery correct installation

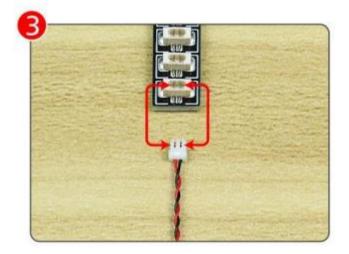

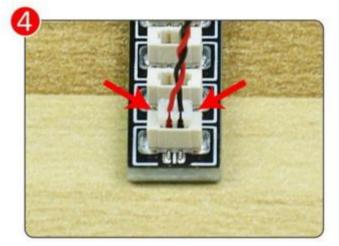

Connect them together, turn on the power, and the test particles light up normally

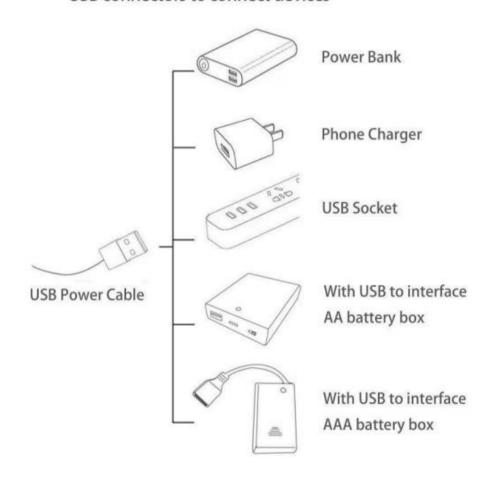

All our connections between plug and socket are all the same as shown above. So for any such structure with plug and socket, please pay attention to the golden wire of the plug and the golden needle of the socket, they must be touched together.

The connection method between the USB Power Cord and Expansion Boards is as follows:

The USB Power Cord can be powered by phone chargers, power banks, etc.

USB connectors to connect devices

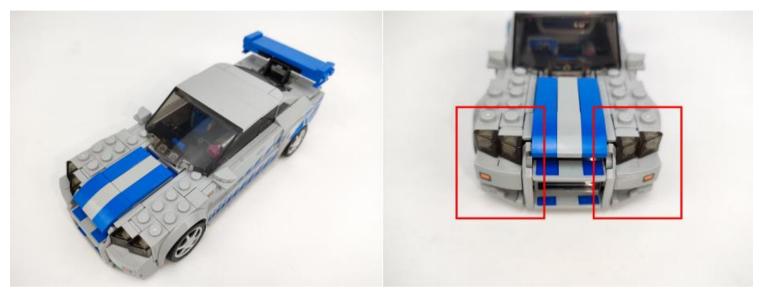

当我们测试"小灯粒 15CM-蓝色"时,取出标有"小灯粒 15CM-蓝色"的袋子。取出其中一盏灯并将其连接到插座上。打开电源,灯将正常亮起,如下图所示。

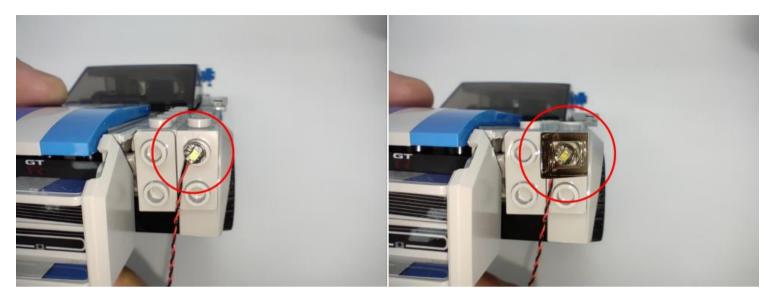

按照这种方法测试每盏灯。需要注意的是,测试后,必须将灯放回相应的袋中,以避免混淆类型。 如果任何组件无法正常工作,请立即联系我们。

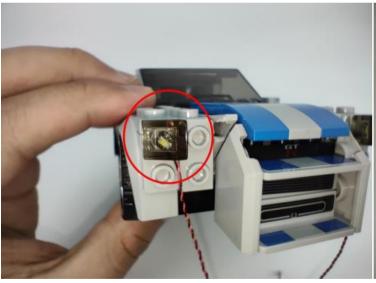

安装步骤

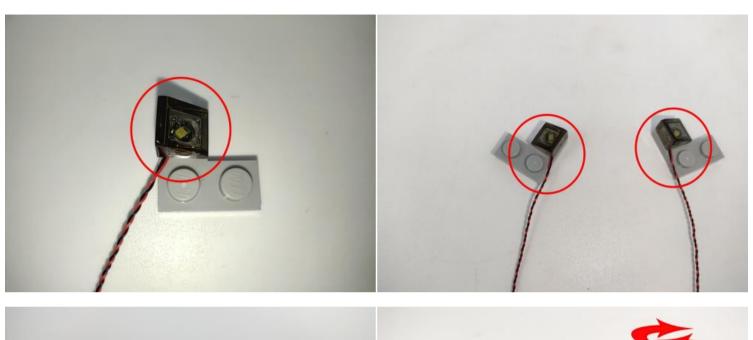

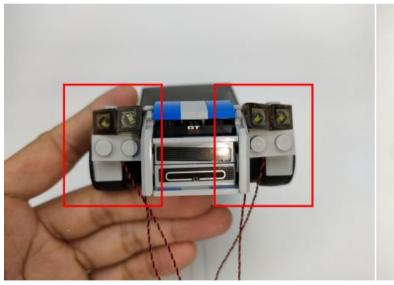

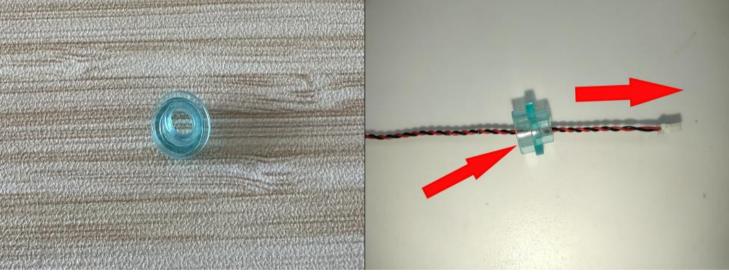

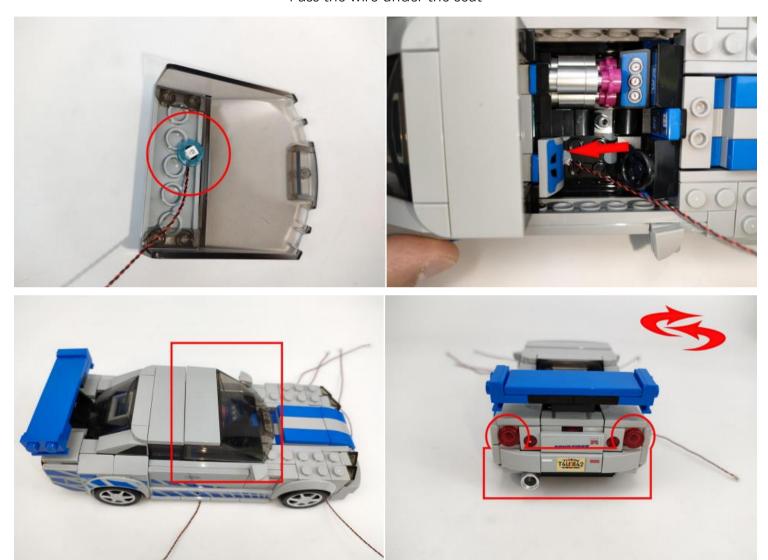

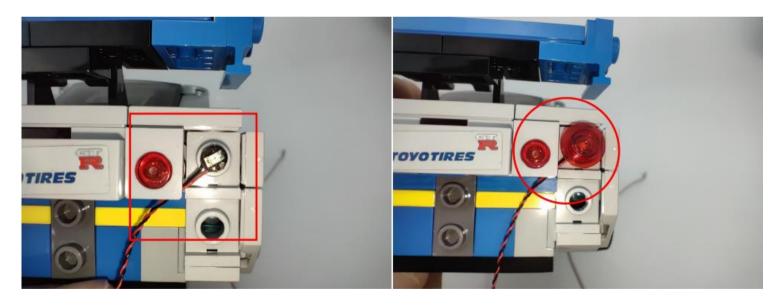

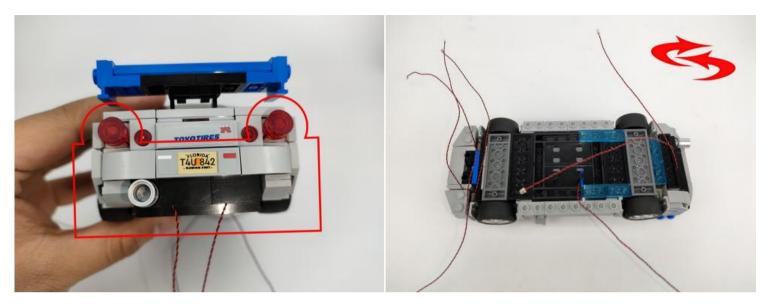

Pass the wire under the seat

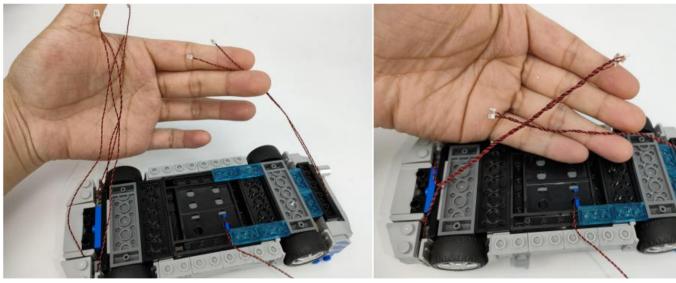

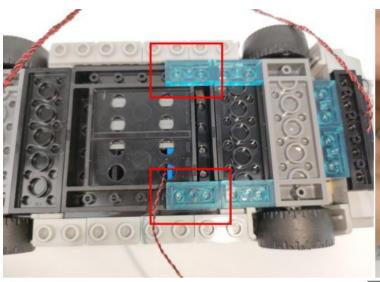

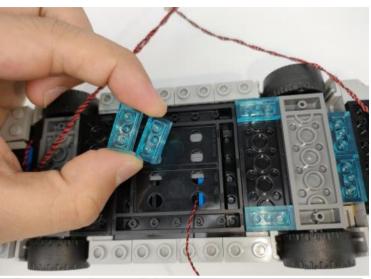

Take out two hollow transparent red circles

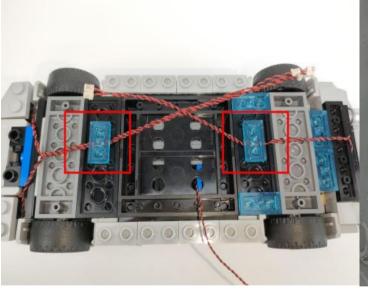

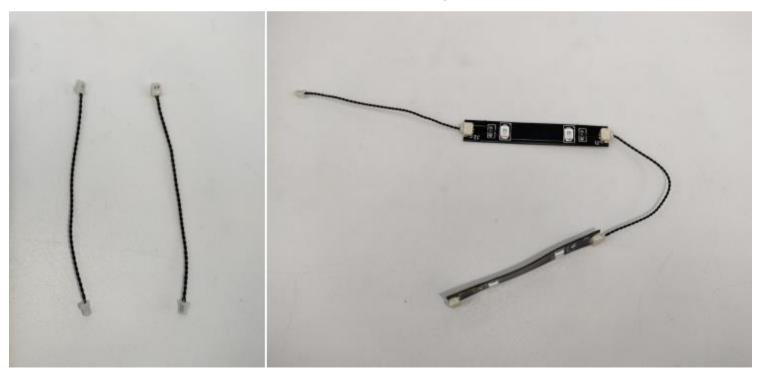

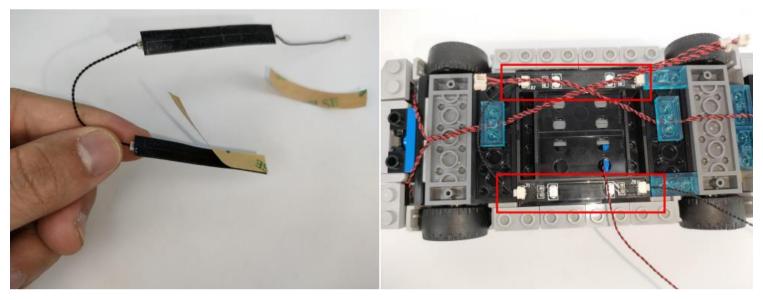

Take out two 5cm connecting cables

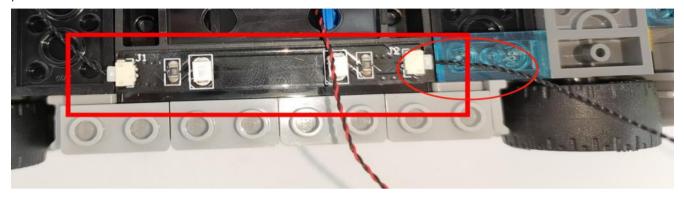

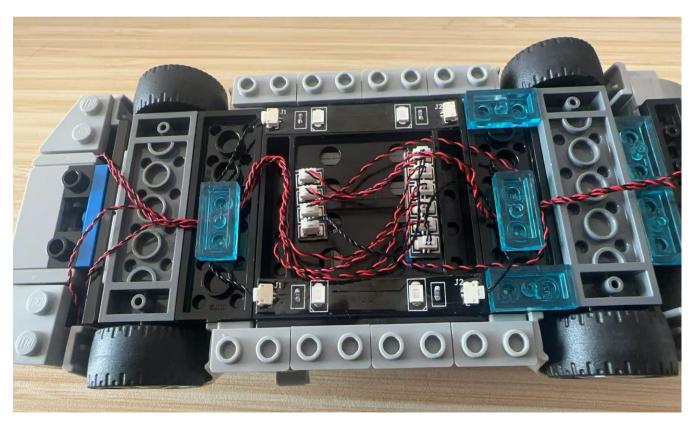

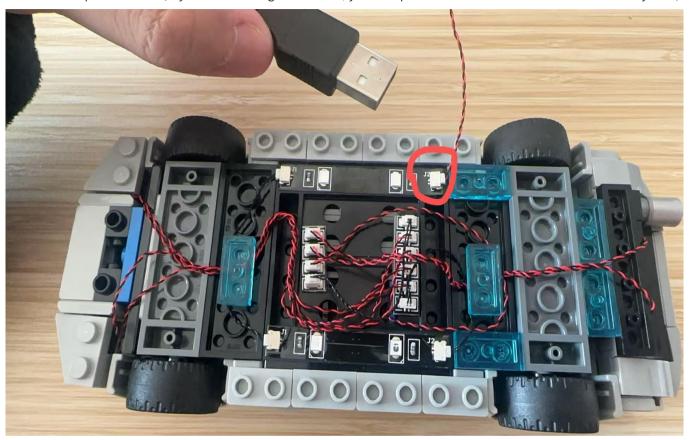

The four white lights on the left and the 5cm line in the picture are inserted into the 6 seats. On the right, two red lights and one blue light are inserted into the four seats, Tear the glue off the back of the expansion plate and stick to the position shown

Take out USB power cord (If you want the light to be on, you can pack three No.5 batteries into the battery box)

Congratulations you have completed all the steps!
